(54) Title: METHOD AND DEVICE FOR PROCESSING DIGITAL IMAGES

(57) Abstract: The invention relates to a method of and a device for processing digital images. The device is such that, the images ($M'i$, $M''i$) being transmitted from a server (202) to a decoder (208, 206) using various modes of display, the images being coded in a dependent manner such that the coding of a first image is used to code a second image. The method is such that the order of transmission of the images from the server to the decoder is determined as a function of the dependence of these images and the mode of display requested by the decoder.
